# Who Are We?

We are a community of companies that design, produce, and implement architectural, interior design, and industrial products in various regions of the business world. All companies are managed with their own capital.

## Türkiye

It is established in Istanbul, Turkey. It serves as the production facility for all other companies. It is responsible for the manufacturing and implementation of metal, wood, flooring, electrical, and all other decoration works. With its 8000 m<sup>2</sup> existing production facility, it collaborates with over 20 expert companies in project management.

## R&D

We produce functional solutions with our technical staff in areas such as architecture, industrial, mechanical, electronic and injection with the strength we get from our design and production experience.

Our technical team do all detailed researches with great care in order to apply the product to the field in the most ergonomic way.

We follow the current technologies and make the necessary research and development.

# Service

After the sales of the projects, we carry out the installation processes of the project with our services throughout Turkey and all over the world. We also provide customer satisfaction and high service needs after installation.

# Logistics & Storage

We do provides both logistics and storage operations of all products from industrial products to architectural products.

It controls the product storage and shipment speed to the warehouse areas in the centers and regions. In this way, the speed of transportation and final point transportation is ensured.

We also have warehouse spaces in cities such as Milan, Miami, Washington and London.
